Applicable Notes			

Icon Energy Services Ltd's technical staff non-destructively examined and serviced the aforementioned equipment in accordance with Icon Energy Services Ltd's procedures, industry standard practices, and/or OEM recommendations as applicable. Upon final inspection of the equipment and any repairs recommended or performed, no unacceptable defects were noted.

Based on the results of our final inspection and assessment, it is our opinion that the aforementioned equipment is safe for use within the original equipment manufacturer's specifications, or the specifications as noted above.

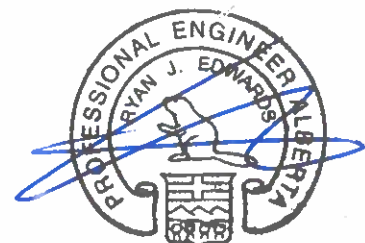

In Accordance with CAOEC Recommended Practice:

This certification is valid until the next scheduled Level IV inspection provided regular inspections are performed as per CAOEC R.P. 2.0/4.0 (Current Edition), or until the equipment has been modified or damaged by handling or operation.

In Accordance with API Recommended Practice:

This certification is valid until the next scheduled Category IV inspection provided regular inspections are performed as per API RP 8B (Current Edition), or until the equipment has been modified or damaged by handling or operation.
