Subject:

Equipment: BJ Side Door Casing Elevator
Model: 5-1/2" x 90°, SLX 100-Ton
Serial No.: 22423 (501)
T&T Inspection Report No.: 22423
Alco Machine Works W.O.: 31867
Engineering File No.: 31867-E

The above mentioned elevator was certified by Alco Machine Works in June 2001 and was retrofitted with a door latch safety pin prior to its release for service.

Since the time of certification, the door latch safety pin was removed. However, the equipment owner has properly reinstalled the door latch safety pin in such a manner which does not jeopardize the structural integrity or functional integrity of the elevator.

It is my opinion that the above mentioned elevator may return to service under the auspices of the original Equipment Certification.
