Subject:

**Equipment: BJ Side Door Casing Elevator**  
**Model: 5-1/2" x 90°, SLX 100-Ton**  
**Serial No.: 33718 (504)**  
**Hydra Inspection Report No.: 8232**  
**Alco Machine Works W.O.: 33718**  
**Engineering File No.: 33718-E**

The above mentioned elevator was certified by Alco Machine Works in November 2001 and was retrofitted with a door latch safety pin prior to its release for service.

Since the time of certification, the door latch safety pin was removed. However, the equipment owner has properly reinstalled the door latch safety pin in such a manner which does not jeopardize the structural integrity or functional integrity of the elevator.

It is my opinion that the above mentioned elevator may return to service under the auspices of the original Equipment Certification.
