Subject:

Equipment: BJ Casing Elevator
Model: 7" x 90°, SLX 150-Ton
Serial No.: 22027 (702)
T&T Inspection Report No.: 22027
Alco Machine Works Inc. W.O.: 31297
Engineering File No.: 31297-E

The above mentioned elevator was certified by Alco Machine Works in April 2001 and was retrofitted with a door latch safety pin prior to its release for service.

Since the time of certification, the door latch safety pin was removed. However, the equipment owner has properly reinstalled the door latch safety pin in such a manner which does not jeopardize the structural integrity or functional integrity of the elevator.

It is my opinion that the above mentioned elevator may return to service under the auspices of the original Equipment Certification.
